THE
ADVANCED REGISTER
YEAR BOOK
of the
HOLSTEIN-FRIESIAN
ASSOCIATION
of AMERICA

VOLUME XXVIII

Containing All Entries Received and Accepted from May 1, 1916 to April 30, 1917; a Complete List of Sires, With All Daughters of Active Sires That Have Been Admitted to Advanced Registry and the Milk and Fat Productions of Such Daughters, Together With Lists of the Sons and Daughters of Such Active Sires as Are Themselves the Sires or Dams of Tested Daughters; a Complete List of Dams With Two or More A. R. O. Daughters; the Records of the Daughters of the Active Dams and the Sons and Daughters of Such Active Dams as Are Themselves the Sires or Dams of Tested Daughters. Also Lists of the Twenty-five Leading Animals in Each of the Seven Classes of the Five Prize Divisions, Other Valuable Lists, and the Prize Lists for the Fiscal Year 1916-1917.

VOLUME XXVIII

INTRODUCTION

RULES

Revised July 9, 1917, by the By-Law Amendment Committee.

PREAMBLE

In accordance with the Constitution and By-Laws of the Association, the Board of Directors adopt the following rules for the establishment and conduct of a System of Advanced Registry, to be known as the Advanced Registry of the Holstein-Friesian Association of America.

RULE I.

DUTIES OF THE SUPERINTENDENT.

1. Subject to the authority of the Board of Directors, the Superintendent of Advanced Registry shall have charge of this Department. Under the general supervision and direction of the Board of Directors, he shall prepare and publish all blank forms, circulars and other printed matter needed; receive and attend to all applications for entry therein; make, cause to be made, or have general supervision over all examinations of cattle made therefor; have general oversight and direction of all tests of milk and butter fat production therefor; issue all Certificates of Registry for entries therein over his signature and the Seal of the Association; edit all publications of this registry, and perform such other duties as may be required of him by the Board of Directors to secure the efficiency and success of the system. He shall keep an accurate account in detail of all moneys received and paid out by him in the performance of these duties. He shall make a full report of his work to the Board of Directors whenever they shall require it, and at least once in each year, at the date of the Annual Meeting.

RULE II.

APPOINTMENT OF INSPECTORS AND SUPERVISORS.

1. The Board of Directors shall appoint one or more persons to be known as Inspectors of Advanced Registry, whose duty it shall be to examine cattle for this registry, or to investigate the conduct of tests, whenever the Superintendent may require. No person shall supervise tests of, or examine for this registry, cattle over which he has charge or in which he has any pecuniary interest.

2. The Board of Directors may authorize State Agriculture Colleges and Experiment Stations, Agricultural School or other institutions, to appoint qualified persons as Supervisors, or the Board of Directors may itself appoint qualified persons to conduct the tests of such cows as may be tested for this registry; but the Superintendent of this Registry may, for cause, reject any such tests or parts of the same. The expenses of making such tests, descriptions and measurements shall in case of tests of cows be paid by the owners of the animal directly to the State Institution

395579

v. 28 Continuation

Dairy 1920-1921 direct

appointing the Supervisor or to the Board of Directors and in cases of inspection to such officer of this Association as the Board of Directors may direct.

3. The Scale of Points adopted by this Association shall be the standard by which animals to be entered in this registry upon examination shall be judged.

RULE III.

CLASSIFICATION OF CATTLE.

1. For all purposes of this registry, the age of any bull shall be the actual age at time of inspection, and the ages of all cows shall be computed as that at the time of last calving or aborting prior to the beginning of the test, all cows being classified as follows:—

2. All animals calving under two and one-half years of age, in a class to be known as the Junior Two-year Form, and numbered as Class 2.

3. All animals calving between the ages of two and one-half and three years, in a class to be known as the Senior Two-year Form, and numbered as Class 2½.

4. All animals calving between the ages of three and three and one-half years, in a class to be known as the Junior Three-year Form, and numbered as Class 3.

5. All animals calving between the ages of three and one-half and four years, in a class to be known as the Senior Three-year Form, and numbered as Class 3½.

6. All animals calving between the ages of four and four and one-half years, in a class to be known as the Junior Four-year Form, and numbered as Class 4.

7. All animals calving between the ages of four and one-half and five years, in a class to be known as the Senior Four-year Form, and numbered as Class 4½.

8. All animals calving at or above the age of five years, in a class to be known as the Full Age Form, and numbered as Class 5.

RULE IV.

ELIGIBILITY OF BULLS.

1. A bull to be eligible to Advanced Registry must be the sire of four or more daughters which have been admitted to this registry on officially authenticated butterfat records. Whenever any bull shall have four or more such daughters, the Superintendent of Advanced Registry shall, without formal application, enter such bull in the Advanced Register; and such bull shall be classified as advanced Registry Standard, which classification shall be indicated by the initial letters, A. R. S. Any such bull may, if his owner so desire, be examined and described by any regularly appointed Inspector; and, if it meet the requirements, such description may be entered in the Advanced Register at the time of entry of such bull.

2. If the entry include description, the following particulars shall be given, namely: Name; number in Herd-Book; age at time of examination; general form; description of head, neck, chine, loin and hips, rump, escutcheon, mammary veins, teats, handling; the secretions of the skin; the general vigor; general symmetry, and general style of bearing. Such report may also give accurate measurements of height of shoulder, height of hips, length of body, length from hook bones to point of rump, width of hips at the hook bones, width at the thurl bones, and girth of chest at its smallest circumference; also the condition and weight of the animal, and the date when the weight was taken. Such reports shall be uniformly made, in accordance with the directions and in the use of such terms in their technical meanings as the Scale of Points may prescribe. A bull to be eligible to entry with description must scale at least eighty points of the Official Scale of Points and must weigh not less than 1,800 pounds in live weight.

RULE V.

ELIGIBILITY OF COWS.

1. Provided she meet certain requirements in butterfat production, hereinafter specified, a cow may be entered in the Advanced Register without examination and description; and only such cows as shall exceed, by not less than 100%, the minimum requirements in butterfat for the age shall be entitled to be entered with description.

2. If the entry include description, the cow must be examined by a regularly appointed Inspector, and be reported by him as worthy of such entry. In the report the specifications mentioned in Rule IV. shall be given; and, in addition thereto, descriptions of udder and quarters of udder. She must scale at least seventy-five points of the Official Scale of Points, and be deemed capable of reaching at full age, in milking condition and ordinary flesh, one thousand pounds in live weight.

3. Only such cows as have made officially authenticated butterfat records, not less in amount than the minimum requirements for the age, as hereinafter specified, shall be eligible to advanced registry; and such cows, when admitted, shall be classified as Advanced Registry Official, which classification shall be indicated by the initial letters, A. R. O. All other cows, which may have been admitted to advanced registry on records made under past rules, shall be classified as Advanced Registry, which classification shall be indicated by the initial letters, A. R.

RULE VI.

BUTTERFAT RECORDS—REQUIREMENTS FOR ENTRY
IN THE SEVERAL FORMS.

1. A cow, calving on or before the day she is two years of age, shall make a record of not less than 7.2 pounds butterfat in seven consecutive days; and for every day that she may exceed two years of age at date of calving in the Junior Two-year Form, the requirements for the butterfat record shall be increased .00439 of a pound.

2. If calving on the day she is two and one-half years of age, she shall make a record of not less than 8 pounds butterfat in seven consecutive days; and for every day that she may exceed two and one-half years of age at date of calving in the Senior Two-year Form, the increased requirements per day shall be the same as in the Junior Two-year Form.

3. If calving on the day she is three years of age, she shall make a record of not less than 8.8 pounds of butterfat in seven consecutive days and for every day that she may exceed three years of age at date of calving in the Junior Three-year Form, the increased requirements per day shall be the same as in the preceding forms.

4. If calving on the day she is three and one-half years of age, she shall make a record of not less than 9.6 pounds butterfat in seven consecutive days; and for every day that she may exceed three and one-half years of age at date of calving in the Senior Three-year Form, the increased requirements per day shall be the same as in preceding forms.

5. If calving on the day she is four years of age, she shall make a record of not less than 10.4 pounds butterfat in seven consecutive days; and for every day that she may exceed four years of age at date of calving in the Junior Four-year Form, the increased requirements per day shall be the same as in preceding forms.

6. If calving on the day she is four and one-half years of age, she shall make a record of not less than 11.2 pounds butterfat in seven consecutive days; and for every day that she may exceed four and one-half years of age at date of calving in the Senior-year Form, the increased requirements per day shall be the same as in preceding forms.

7. If calving on the day she is five years of age she shall make a record of not less than 12 pounds butterfat in seven consecutive days; and no increase in production for increased age at date of calving shall be required for any cow calving in the Full Age Form.

SPECIAL RULES FOR THE CONDUCT OF OFFICIAL TESTS.

HOW SUPERVISED.

1. An official test is defined as a test made under the supervision of a representative of a State or Provincial Agricultural College or other institution designated by the Board of Directors, whose integrity and ability is vouched for by such officer of that State or Provincial Agricultural College, or other institution, as shall be placed in charge of tests of dairy cows, or, in case supervisors cannot be otherwise obtained, by competent persons appointed by the Board of Directors of the Holstein-Friesian Association.

Subject to all the conditions imposed by the Rules of this Association, State Agricultural Colleges may supervise the tests made by cows in their own herds; but no cow owned by such an institution, and tested under the supervision of its own officers, shall be eligible to compete for any prize that may be offered by this Association.

NECESSARY PRELIMINARIES.

2. No person or persons shall have the record of any cow entered in the Holstein-Friesian Advanced Register, unless previous application shall have been made by the owner, or person in charge, to the Superintendent of Advanced Registry for permission to test, and a permit shall have been issued by the Superintendent. Such applications for permission to test shall be made upon blank forms to be furnished by the Superintendent upon request of the owner, or person in charge of the cow; and the form shall be fully filled in so as to give information as to name, Herd-Book number, classification, probable date of calving, the number of tests contemplated, and such other data as may be required. The permit issued shall be in duplicate, and shall include the list of cows given on the application, or such part of them as may be permissible; and one copy of the permit shall be sent by the Superintendent to the Institution expected to appoint the supervisor.

It is the intent and purpose of this rule to provide the Superintendent and the Institution which may supply the supervisors, with ample notices of the number of tests contemplated to be made in the future, in any given period, in order that proper facilities may be provided therefor, and that the Superintendent may have full knowledge of such testing as is contemplated.

3. The form used for such applications for permission to test shall be provided by the Superintendent's office and shall be in such form as to permit of filing for ready reference. And it shall be so filed or recorded as to indicate the tests contemplated to be made in any month of the year, and about the day of each month, and the location thereof.

4. Each Supervisor, upon receipt of his appointment from the institution which he represents, shall, upon a form furnished by the Superintendent of Advanced Registry, notify the latter of the fact that he is to be present at the designated place and will proceed to enter upon his duties about a certain date; the Superintendent upon receipt of such notification from the supervisor shall file or record the same in order of its date in a classified list by states.

5. An official test may cover a period of any number of consecutive days; and if, during any period of seven consecutive days, such test meet the requirements for entry, it may be entered in the Holstein-Friesian Advanced Register. No official test shall be accepted that is begun earlier in the lactation period than the morning of the seventh day after calving. In counting the days for the six-day interval, the calendar day on which the calf is born may be counted as the first of these days.

When any series of official tests is completed, the owner or person in charge shall report the results of the tests upon forms furnished by the Superintendent of Advanced Registry for that purpose.

FEED AND DRINK.

6. During the official test period, no condiments, condition powders, tonics or drugs may be given any cow, other than what she may of her own act and free will consume; and no other liquid than pure water may be given as drink. Dry foods may be softened with water or molasses, but with no other liquid. But nothing in this rule shall be taken as forbidding proper medical attendance, either by a regularly qualified veterinarian or by the owner or person in charge, upon a sick cow. In any such case, the owner of the cow, or person in charge, shall make a statement in writing over his signature and affidavit, describing the condition of the cow, and reporting all medicines given; which statement shall also be signed by the veterinarian, if one be called. The supervisor of the test shall also, over his own signature, add to the statement the declaration that, to the best of his knowledge and belief, the conditions were as stated, and that he approved of the treatment given the cow. Such statement and declaration shall be considered as forming part of the application for entry of the record in the Advanced Register.

Nothing in this rule shall be construed to authorize or permit undue blanketing or sweating, external applications or administering, by giving or injecting, any drugs, stimulants, medicine, or any substance or thing that would produce an abnormal condition, fever, or excitement in the cow, or any condition inconsistent with normal dairy husbandry.

And if it shall be ascertained at any time that the spirit and intent of this rule has been violated or evaded, then and in that case any record made or influenced by any means in violation of this rule may be rejected; and if it has been accepted, it may then be expunged and canceled of record and rejected; and any person violating this rule may be expelled and excluded from and denied all privileges or rights or recognition in or by this Association.

IDENTIFICATION.

7. Before the test of any cow is begun, she shall either have been registered in the Holstein-Friesian Herd-Book, or proper application for such registry shall have been made. If registered, by comparison of the Certificate of Registry with the cow the supervisor of the test shall satisfy himself that the cow answers the description as to color-markings given on the certificate. If the color-markings of the animal do not agree with those on the certificate or with the description therein, or for any reason the Certificate of Registry is not at hand for comparison, the supervisor shall make diagrams of color-markings of the cow, and shall attach the same to his detailed report of her test sent to the Superintendent of Advanced Registry. No such test shall be entered by the Superintendent of Advanced Register until such time as the owner of the cow tested shall lay before him a Certificate of Registry agreeing as to color-markings with those of the diagrams attached to the report of that cow by the supervisor of the test.

CONDUCT OF TEST.

8. The supervisor of a test shall see the cow milked dry at its commencement, shall make a note of the exact time at which he pronounced the cow dry, and shall be present thereafter at each milking until the test is completed. It is recommended that, as a rule, no supervisor may, at one time, have charge of more than six cows in test; and under no circumstances may more cows than one undergoing test be milked at the same time, except where a milking machine may be used. In case of the use of a milking machine, not to exceed four cows may be milked at one time, and only one operator may be in attendance and only one cow may be milked in the same bucket at the same time. The supervisor shall determine the weight of

each milking and its average per cent of fat separately; making all determinations of fat in duplicate and entering on his report the average of the two determinations so obtained. In all states using the composite sample, he shall at the close of the test send to his college a composite-test sample, to which each and every milking of the test shall have proportionately contributed, as a check upon his work; and he shall make a detailed report of the test over his signature and affidavit, which report shall be sent through the hands of his appointing officer to the superintendent of Advanced Registry as soon as possible. In all states in which the oath of office is administered to supervisors, the affidavit may be omitted.

MAKING PARTIAL PRELIMINARY REPORTS.

9. Upon the completion of the first three days of any official test, in which the average daily fat production shall be found to exceed a certain minimum for the age—which minimum average production is stated on Form 5, the form used for making partial preliminary reports in cases of large production to the Superintendent of Advanced Registry—it shall be the duty of the owner or person in charge to report, either in person or through the supervisor in charge of the test, to the Superintendent of Advanced Registry the name and Herd-Book number of the cow, date of last calving, age of the cow at that time, totals of the amount of milk and fat for the first day, with a detailed report of production for the following two days; and such a detailed report shall be made to the Superintendent of Advanced Registry every second day while the production exceeds the stated minimum, or until such time as the Superintendent may permit a discontinuance. It shall be the duty of the Superintendent on receipt of such report, in case the first or any subsequent report shows an unusually large production, or a production that would equal or exceed the record of its class, to give immediate notice thereof and to make public the fact by publication or otherwise. Upon the receipt of one or more such partial preliminary reports, if the Superintendent decides that it is desirable to have a verification test conducted, he is authorized to provide for a verification test of such length of time as he may deem advisable, and to see that the same is properly conducted.

CONDUCT OF VERIFICATION TESTS.

10. Whenever a verification test is ordered, the supervisor appointed to conduct such verification test may for the time being and as far as relates to the cow or cows under verification test, relieve the supervisor in charge. He shall whenever possible carry his own outfit with him, and shall conduct the verification test as though he were the only supervisor on the ground. At the close of the verification test he shall make a report in detail both to the officer appointing him and to the Superintendent of Advanced Registry. If the appointing officer so desires, the supervisor in charge may continue with the test of the cow or cows under verification test; and in that case the supervisor in charge of the verification test need not report his findings to the supervisor in charge of the regular test nor to the owner of the cow. In cases of very large production the Superintendent of Advanced Registry may ask for the appointment of two supervisors for the conduct of a verification test. In any such case, the two supervisors shall, as far as relates to the cow or cows under verification test, relieve the supervisor in charge of the test, and shall take turns in keeping the cow or cows constantly under observation during the entire time of the verification test. In any case where the supervisor in charge has been temporarily relieved, he may at the close of the verification test resume charge of the tests in progress. If, upon receipt of the report of the verification test, the Superintendent is not satisfied that the test has been fully authenticated, he is authorized to reject it entirely, and the expense of the verification test shall be borne by the owner of the cow. But if the Superintendent is satisfied with the correctness of the test, the expense of the verification test shall be borne by the Association.

ENTRIES DEFERRED OR REFUSED.

11. But no tests of cows shall be accepted for the Advanced Register by the Superintendent unless he shall be satisfied that such tests have been in all things fairly and honestly conducted and that the rules of the Association have been complied with. If the Superintendent shall be satisfied that any dishonest or improper practice in connection with the making of any test has been employed, or a reasonable suspicion thereof exists, he may reject such test, or, if the same has been previously accepted, he or the Board of Directors may cancel such acceptance, and in all such matters his decisions shall be final.

AWARD OF PRIZES.

12. The Board of Directors shall provide for the awarding of prizes for the production of milk and of butterfat in official and semi-official tests, each division constituting a separate prize division divided into classes by ages.

No herd shall be awarded, within any fiscal year, more than three of the classified prizes in any one prize division; these shall be those which will aggregate the largest sum to the owner, prizes in class for older cows taking precedence. No cow shall, in the same lactation period, be eligible to compete more than once for prize money in any one prize division.

ADVANCED REGISTRATION A PRIVILEGE—NOT A RIGHT.

13. The acceptance of tests for advanced registration rests in the discretion of the Association and is not a matter of right accorded to members, but is a privilege to be granted or refused in the discretion of the Superintendent of Advanced Registry or the Board of Directors.

DECISION OF SUPERINTENDENT FINAL.

14. All matters not covered by these rules, as to the making and reporting of officially authenticated milk and butterfat tests, shall be under the direction of the Superintendent of Advanced Registry, and his decision shall be final.

SPECIAL RULES FOR THE CONDUCT OF SEMI-OFFICIAL LONG-TIME TESTS.

HOW DEFINED.

1. A semi-official yearly or lactation test is defined as a test based upon a regular official test of the cow for a period of not less than two consecutive days during each month of the test; the semi-official test beginning no earlier than the fourth day after calving, and continuing during that period of lactation, or such consecutive part of it as the owner may desire, but not exceeding 365 days in length; and if the cow has been admitted to the Advanced Register, and such semi-official test meet the requirements, it shall be accepted by the Superintendent of Advanced Registry, be publicly reported by him, and entered in the current volume of the Holstein-Friesian Advanced Register.

WHAT CONSTITUTES THE REQUIREMENTS.

2. Any cow that has once been admitted to the Advanced Register, and has thus become A. R. O., is entitled to have any semi-official test that she may make admitted to the Advanced Register, provided it meet the requirements and be approved by the Superintendent. For all purposes of advanced registry classification of animals making semi-official tests, the age shall be computed as that at the time of last calving or aborting, the same as in the other divisions; and the requirements in production entitling such records to entry in the Advanced Register shall be as follows: A cow calving or aborting on or before the day she is two years of age shall produce during that period of lactation, and within a period of not exceeding 365 consecutive days, not less than 250.6 lbs. of butterfat; and for every day she exceeds two years of age

at last calving or aborting, the requirement in butterfat shall be increased one-tenth of a pound. This increased requirement of one-tenth of a pound of butterfat daily for each day's increase in age shall continue until the requirement reaches 360 lbs. at the age of five years, after which no further increase shall be made.

HOW SUPERVISED.

3. Not less than three different supervisors shall be employed in the conduct of any semi-official test, and when practicable to make changes no supervisor should conduct the tests of two successive months. It is recommended that whenever possible not less than four supervisors shall be employed in the conduct of every yearly test. The conduct of the official portion of a semi-official test shall in no respect differ from the conduct of any other official test; and all rules for the conduct of official tests that may be applicable to the semi-official test, inclusive of that for verification, shall apply. But thirty days' milk may be credited to any cow prior to the beginning of her first official test of that lactation period. The first official test in any lactation period should be begun not earlier than six nor later than thirty-four days from calving; and, thereafter, the intervals between the monthly official tests shall be as even as it may be practicable for the State Agricultural College having the tests in charge to make them. When but one official test is made in any one month, the interval between that test and the test of the following month should not be less than fifteen days. It is recommended that, as a rule, no supervisor shall, at any one time, have charge of more than eight cows under test; and under no circumstances may more cows than one undergoing official test be milked at the same time, except in case of the use of a milking machine, as specified in Rule 8 of the Special Rules for the Conduct of Official Tests. On the completion of each and every milking, the supervisor shall enter the weight of the milk on the owner's stable milk sheet as well as in his own note-book. Except when making a not less than 7-day official test, no cow shall be milked more times during the conduct of the official part of the semi-official test for any month than she is milked during the non-official part of the test for that month.

THE BASIS FOR COMPUTATION.

4. The average per cent of fat found in the milk during the period or periods of official test in any one calendar month shall, as a rule, be used as a basis for computation of the approximate amount of fat in the milk of that calendar month; and if, at the request of the owner, thermometer and lactometer readings are entered in the supervisor's report, such readings shall be used as a basis for computation of the approximate amount of total solids in the milk of that calendar month. An owner may have as many official test periods in any one month as he may desire, and the more the better; but each official test period must be reported in full by the supervisor. No selection is allowable in the reporting of official test periods in semi-official test work, and the suppression of the report of any test period will invalidate the whole test. In the case of cows freshening too late, or the semi-official test being completed too early for the regular official test period of the owner's herd for that month, the results of the official test of the succeeding month in the one case, and of the preceding month in the other, shall be used in determining the credits for such portions of calendar months.

DUTIES OF OWNER AND SUPERINTENDENT.

5. The owner of the cow shall see that the milk of each milking during the whole test period is correctly weighed and the correct weight entered on his stable milk-sheet; and he shall preserve his stable milk-sheet until the test be completed. At the close of each calendar month, or within ten days thereafter, the owner or person in charge shall make a complete report in detail of the milk production of that month for each cow in test to the Superintendent of Advanced Registry, on blanks furnished him for that purpose, and shall make affidavit to the correctness of the same. Should

any milking be lost, the space for the entry of the same shall be left blank, and the Superintendent of Advanced Registry is authorized to insert in the blank space the average weight of the ten nearest milkings of that month, made at that hour, as the estimated weight of the milking lost. The Superintendent of Advanced Registry shall use the weights of the several milkings reported by the supervisor of the official part of the test for that month as a check upon the weights of the milkings for the non-official part of the month reported by the owner of the cow.

EQUITABLE ADJUSTMENT OF CREDITS.

6. Should any monthly milk report made by the owner not show a reasonable agreement as to daily production with the report or reports of the official test period or periods of that month made by the supervisor, the superintendent may reject the monthly milk report made by the owner, and may compute the milk production for the month from the average daily milk production shown during the official test periods of that month. Whenever any official test period may be made so early or so late in any calendar month as to give, if alone used as a basis, inequitable results for that month, the superintendent may, in addition, use the official test period of either the preceding or succeeding months in order to average the per cent fat for that month. Should the average per cent fat found in the milk during any monthly test be abnormal, the Superintendent of Advanced Registry may reject that test and use the average per cent fat obtained from the preceding and succeeding months as a basis for computation of the fat production of that month.

WHAT CONSTITUTES THE RECORD.

7. The sum of the monthly credits for milk for the full period of 365 days, or for the consecutive part thereof during which the cow was under test, and the sums of the monthly credits of butterfat and of total solids, if the latter be computed, shall constitute the semi-official record of milk, butterfat, and total solids, for the period during which the cow was under test; and in the reporting of such tests, or the entering of them in the Advanced Register, the length of the test in days shall always be given. On the completion of any such semi-official record and its admittance to the Advanced Register, the Superintendent of Advanced Registry shall issue to the owner of the cow a suitable certificate, in like manner as is done in the case of other re-entries in the Advanced Register.

SUPERINTENDENT'S DECISION FINAL.

8. The semi-official records shall constitute a prize division, divided into classes by ages in like manner as are the other divisions, and subject to the same limitations in the awarding of prizes. All matters not covered by these rules, as to the making and reporting of all semi-official tests, shall be under the direction of the Superintendent of Advanced Registry, and his decision shall be final.

RULE VII.

RE-ENTRY OF COWS MAKING ADDITIONAL RECORDS —ENTRY OF DEAD COWS.

Any record of milk and butterfat, made by any cow living or dead, equal to or exceeding the requirements for like ages, may be recorded in the Advanced Register, provided the rules of the Association have been complied with in the making of such records, and such records be approved by the superintendent; and if the cow be already entered in this registry, the entry of such additional record shall constitute a re-entry.

RULE VIII.

THE ISSUE OF CERTIFICATES OF ENTRY.

1. The Superintendent of Advanced Registry shall carefully examine each application for advanced registration, shall ascertain that all the requirements per-

taining to such application have been met, and shall see that the name and number given the animal are in accordance with the records in the Holstein-Friesian Herd-Book. If he find all statements to be correct and all requirements to have been met, the Superintendent shall enter the animal in the Advanced Register, and shall issue a Certificate of advanced registration to the applicant.

2. In the accepting of any application for advanced registration of a Holstein-Friesian cow based on any test, clerical errors found in the report of the test may be corrected. The application and all other evidence on which the Superintendent makes an entry in the Advanced Registry shall be filed by him; but no files of the Advanced Registry office of any kind shall be open to the examination of any person except on an order from the Board of Directors.

RULE IX.

EXPUNGING OF INCORRECT ENTRIES.

Upon evidence of such incorrectness, any incorrect entry may be expunged from the manuscript or printed volumes of this registry by the Board of Directors, and the Certificate of Registry be revoked; and in such case, the Board of Directors shall cause to be published in the next following volume of this registry the revocation of such record and certificate thereof.

RULE X.

PAY OF INSPECTORS AND SUPERVISORS FOR TIME AND EXPENSES.

1. For the time necessarily spent in making examinations of cattle or in supervising tests, and for the necessary expense incurred, Inspectors and Supervisors are entitled to compensation, the charges for which shall be borne by the owners of the cattle inspected or tested.

2. In the case of Supervisors appointed by Agricultural Colleges, Experiment Stations, Agricultural Schools or other institutions, or Board of Directors, the amount of such compensation shall be determined by the Agricultural College, Experiment Station or Institution making the appointment, or by the Board of Directors. The compensation of Inspectors shall be determined by the Executive Committee or the Board of Directors.

3. All expenses, inclusive of compensation for time and necessary traveling expenses of Supervisors or Inspectors, incurred in the examination of cattle or in the making of official records, except in certain cases of re-test or verification as hereinbefore mentioned, shall be paid by the owners of the animals applying for such examinations, or for such supervision in the making of official records. If cattle of different applicants are examined or tested during the same trip, the person making such examinations or supervising such tests, shall divide his traveling expenses among such applicants in a just and equitable manner.

4. The Holstein-Friesian Association, through the Superintendent of Advanced Registry, guarantees State Agricultural Colleges, and other institutions authorized to appoint supervisors, or supervisors appointed by the Board of Directors, against loss in the conduct of tests of registered Holstein-Friesian cows.

5. Should any owner of a Holstein-Friesian cow that has been tested under the supervision of any State Agricultural College or other authorized institution or by any person appointed by the Board of Directors, fail to pay the bill for the conduct of the test of that cow, and the college or other authorized institution, or person, after having made due effort to collect, turn the bill over to the Superintendent of Advanced Registry for collection, the Superintendent shall notify the owner of such action, and shall allow a reasonable time for the payment of the bill.

6. If, at the expiration of the time allowed by the Superintendent, the bill remains unpaid and no arrangement for its payment has been made either with the institution appointing the supervisor or the Superintendent, the Superintendent

shall pay the bill from his guaranty appropriation, and shall by mail demand payment thereof from the delinquent owner.

If said bill is not paid within thirty days after such demand, the delinquent owner may be suspended by the Board of Directors from all privileges of the Association until such time as his indebtedness is paid. The Superintendent shall notify the Secretary of such suspension, and shall again notify him at such time as the indebtedness is paid and the suspension lifted.

7. It is recommended to State Agricultural Colleges and other authorized institutions and persons that officers in charge of test work do not certify reports of tests of Holstein-Friesian cows to the Superintendent of Advanced Registry until such time as the bills for the conduct of the tests have been paid, or due effort to collect bills has been made; and that in the event of a failure to collect any bill for the conduct of the test of any Holstein-Friesian cow, the State Agricultural College, or other authorized institution, or person, send the certified report of test to the Superintendent of Advanced Registry only when accompanied by a copy of the unpaid bill and a statement of the case.

RULE XI.

NO FEES REQUIRED FOR ENTRY TO ADVANCED REGISTRY.

1. In view of public benefits accruing from results attained under this system of Registry, and the personal benefits to owners and breeders of Holstein-Friesian cattle from demonstration of the superiority of the breed by properly authenticated milk and butterfat records, made, gathered, published and preserved through this system, no fee shall be charged for any form of entry in this registry; but a fee of fifty cents shall be paid to the Superintendent of Advanced Registry for each duplicate certificate of entry or re-entry, issued more than three months later than the date of the original.

RULE XII.

ARRANGEMENT AND PUBLICATION OF ENTRIES.

In each printed volume of this registry, the rules and requirements under which entries are made, together with the Scale of Points of this breed, may be printed in the introduction thereof. Entries shall be arranged in two main divisions: *viz.*, cows and bulls; and, in addition to its Advanced Registry number, each animal shall appear with the original name and number under which it is recorded in the Herd-book of this Association. The number of copies of each volume of the Advanced Register Year Book, as well as the price per copy, shall be fixed by the Board of Directors.

RULE XIII.

REVISION OR AMENDMENT OF PRECEDING RULES.

These rules may be revised or amended by vote of the Board of Directors at any regular called meeting of the Board.

SCALE OF POINTS

REVISED AND ADOPTED JUNE 1, 1901

FOR BULLS

	Points
Head—Showing full vigor; elegant in contour.....	2
Forehead—Broad between the eyes; dishing.....	2
Face—Of medium length; clean and trim, especially under the eyes; the bridge of the nose straight.....	2
Muzzle—Broad with strong lips.....	1
Ears—Of medium size; of fine texture; the hair plentiful and soft; the secretions oily and abundant.....	1
Eyes—Large; full; mild; bright.....	2
Horns—Short; of medium size at base; gradually diminishing towards tips; oval; inclining forward; moderately curved inward; of fine texture; in appearance waxy.....	1
Neck—Long; finely crested (if the animal is mature); fine and clean at juncture with the head; nearly free from dewlap; strongly and smoothly joined to shoulders.....	5
Shoulders—Of medium height, of medium thickness, and smoothly rounded at tops; broad and full at sides; smooth over front.....	4
Chest—Deep and low; well filled and smooth in the brisket; broad between the forearms; full in the foreflanks (or through at the heart).....	7
Crops—Comparatively full; nearly level with the shoulders.....	4
Chine—Strong; straight, broadly developed, with open vertebrae.....	6
Barrel—Long; well rounded; with large abdomen; strongly and trimly held up.....	7
Loin and Hips—Broad; level or nearly level between hook bones; level and strong laterally; spreading from the chine broadly and nearly level; the hook bones fairly prominent.....	7
Rump—Long; broad; high; nearly level laterally; comparatively full above the thurl; carried out straight to dropping of tail.....	7
Thurl—High; broad.....	4
Quarters—Deep; broad; straight behind; wide and full at sides; open in the twist....	5
Flanks—Deep; full.....	2
Legs—Comparatively short; clean and nearly straight; wide apart; firmly and squarely set under the body; arms wide, strong and tapering; feet of medium size, round, solid and deep.....	5
Tail—Large at base, the setting well back; tapering finely to switch; the end of bone reaching to hocks or below; the switch full.....	2
Hair and Handling—Hair healthful in appearance; fine, soft and furry; skin of medium thickness and loose; mellow under the hand; the secretions oily, abundant and of a rich brown or yellow color.....	10
Mammary Veins—Large; full; entering large orifices; double extension; with special development, such as forks, branches, connections, etc.....	10
Rudimentary Teats—Large; well placed.....	2
Escutcheon—Largest, finest.....	2

Perfection..... 100

General Vigor—For deficiency Inspectors may discredit from the total received, not to exceed eight points.

General Symmetry and Fineness—For deficiency Inspectors may discredit from the total received, not to exceed eight points.

General Style and Bearing—For deficiency Inspectors may discredit from the total received, not to exceed eight points.

Credits for Offspring—A bull shall be credited one point in excess of what he is otherwise entitled to, for each and every animal of which he is sire, actually entered in the Advanced Register, not to exceed ten in number.

FOR COWS

	Points
Head—Decidedly feminine in appearance; fine in contour.....	2
Forehead—Broad between the eyes; dishing.....	2
Face—Of medium length; clean and trim, especially under the eyes, showing facial veins; the bridge of the nose straight.....	2
Muzzle—Broad, with strong lips.....	1
Ears—Of medium size; of fine texture; the hair plentiful and soft; the secretions oily and abundant.....	1
Eyes—Large; full; mild; bright.....	2
Horns—Small; tapering finely towards the tips; set moderately narrow at base; oval; inclining forward; well bent inward; of fine texture; in appearance waxy....	1
Neck—Long; fine and clean at juncture with the head; free from dewlap; evenly and smoothly joined to shoulders.....	4
Shoulders—Slightly lower than hips; fine and even over tops; moderately broad and full at sides.....	3
Chest—Of moderate depth and lowness; smooth and moderately full in the brisket, full in the foreflanks (or through at the heart).....	6
Crops—Moderately full.....	2
Chine—Straight; strong; broadly developed, with open vertebrae.....	6
Barrel—Long; of wedge shape; well rounded; with a large abdomen, trimly held up (in judging the last item age must be considered).....	7
Loin and Hips—Broad; level or nearly level between the hook bones; level and strong laterally; spreading from chine broadly and nearly level; hook bones fairly prominent.....	6
Rump—Long; high; broad and roomy pelvis; nearly level laterally; comparatively full above the thurl; carried out straight to dropping of tail.....	6
Thurl—High; broad.....	3
Quarters—Deep; straight behind; twist filled with development of udder; wide and moderately full at the sides.....	4
Flanks—Deep; comparatively full.....	2
Legs—Comparatively short; clean and nearly straight; wide apart; firmly and squarely set under the body; feet of medium size, round, solid and deep.....	4
Tail—Large at base, the setting well back; tapering finely to switch; the end of the bone reaching to hocks or below; the switch full.....	2
Hair and Handling—Hair healthful in appearance; fine, soft and furry; the skin of medium thickness and loose; mellow under the hand; the secretions oily, abundant and of a rich brown or yellow color.....	8
Mammary Veins—Very large; very crooked (age must be taken into consideration in judging of size and crookedness); entering very large or numerous orifices; double extension; with special developments such as branches, connections, etc.	10
Udder and Teats—Very capacious; very flexible; quarters even; nearly filling the space in the rear below the twist, extending well forward in front; broad and well held up.....	12
Teats—Well formed; wide apart, plumb and of convenient size.....	2
Escutcheon—Largest; finest.....	2

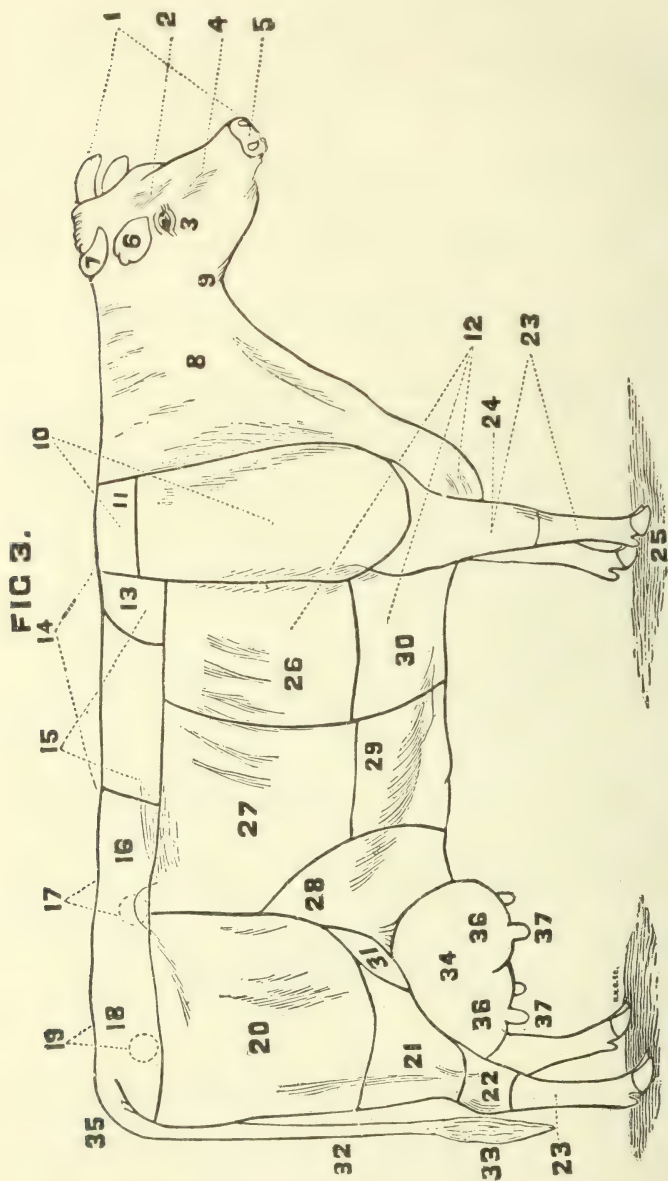

Perfection..... 100

General Vigor—For deficiency Inspectors may discredit from the total received, not to exceed eight points.

General Symmetry and Fineness—For deficiency Inspectors may discredit from the total received, not to exceed eight points.

General Style and Bearing—For deficiency Inspectors may discredit from the total received, not to exceed eight points.

Credits for Excess of Requirements in Production—A cow shall be credited one point in excess of what she is otherwise entitled to, for each and every ten per cent that her butter-fat record exceeds the minimum requirements for her age.

- 1—Head. 2—Forehead. 3—Eye. 4—Face. 5—Muzzle. 6—Ear. 7—Horn. 8—Neck. 9—Throat. 10—Shoulder. 11—Shoulder Top. 12—Chest. 13—Crops. 14—Chine. 15—Back. 16—Loin. 17—Hip or Hook. 18—Rump. 19—Thurl. 20—Quarter. 21—Thigh. 22—Hock. 23—Leg. 24—Fore-arm. 25—Hoof. 26—Fore-ribs. 27—Back-ribs. 28—Flank. 29—Belly. 30—Fore-flank. 31—Stifle. 32—Tail. 33—Switch. 34—Udder. 35—Setting of Tail. 36—Quarters of Udder. 37, 37—Teats.

VOLUME XXVIII

List of Sires of Official Record Cows and Proved Sons and Daughters of Such Sires

Each sire's name is followed in the same line by his Advanced Register number, if he has one, then a hyphen, and then his Herd-Book number. If he has no Advanced Register number, the number given is his Herd-Book number.

The first figure in the parentheses following a sire's name indicates the number of his A. R. O. daughters; the second figure, the number of sons that he has that are sires of tested daughters; and the third figure, the number of daughters that he has that are dams of tested daughters.

Under each *active* sire's name will be found a list of his tested daughters with their records; and following the list of daughters with records will be found, printed in *italics*, the names and Herd-Book numbers of the sons that are sires of tested daughters and of the daughters that are dams of two or more tested daughters.

An active sire is defined as any sire that has had one or more new daughters admitted to advanced registration during the fiscal year 1916-17, or has had one or more daughters previously entered in the Advanced Register that has bettered a previous record. All other sires are considered as inactive, and will be found listed in their proper places with a reference to the last volume in which they appear as active sires.

Following the names of each tested daughter of any sire will be found three numbers separated by hyphens. The first number is the cow's A. R. O. number, the second is the number of the volume of the Advanced Register in which the record given will be found, and the third is the Herd-Book number.
